

# TIMEMORE Brewer Set

## Slow coffee time

---

### **Extraction in 3 layers**

Fit paper filter perfectly in a 3-Layer construction. Beginners can also have the clear instructions.

### **Closer fit with paper**

Concave surface ensured a closer fit with paper filters, which makes a even extraction.

### **Smoother Permeability**

With a better permeability, you don't have to worry about the over-extraction of slow water-flow.

### **Diamond-like luster**

It shows dazzling light like a diamond in the sun.

# CRYSTAL EYE DRIPPER

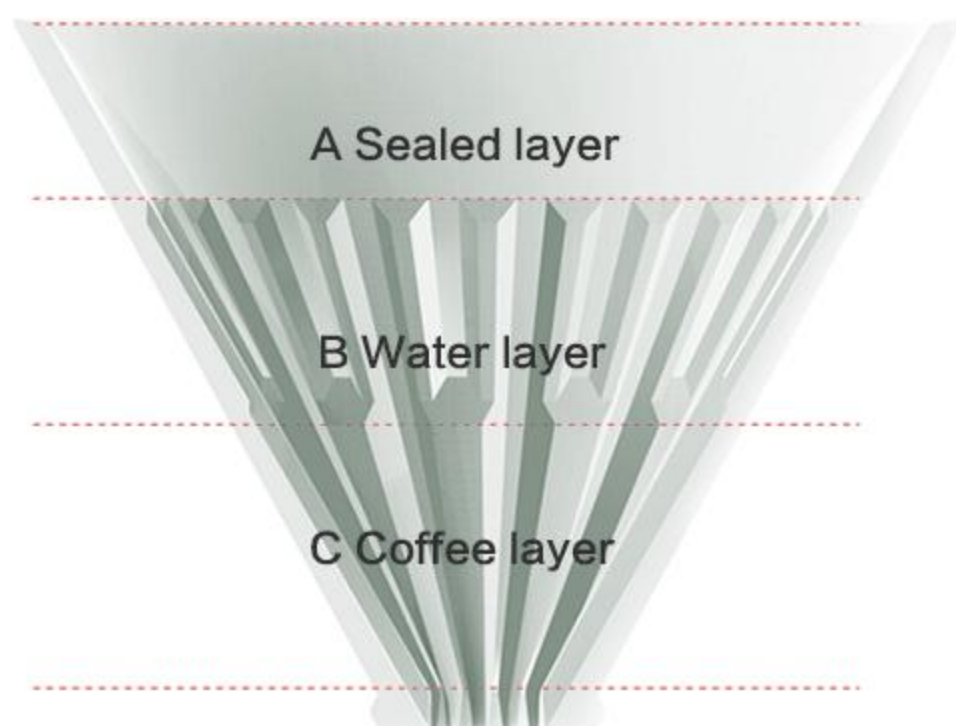

A GOOD GIFT FOR COFFEE NERDS

---

# Precise design for Professional Extraction

## A. Sealed Layer

Filter paper and dripper fit fully. There is no groove between them. Water can't pass. It can control the water-flow when you pour in a larger water flow.

## B. Water Layer

The area of the concaves is gradually reduced to control the flow rate.

## C. Coffee Layer

15 / 20g ground coffee will just take over this layer.  
There are not many ribs in this layer but more grooves  
It's similar to the flannel-like extraction.

Filter fully fits the dripper

# Food-grade PCTG material

## Safe and healthy Use with confidence

Selected PCTG material with high light  
transmission and high water-inducing

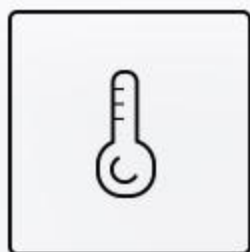

# Stable Base design Easy to place firmly

The bottom is thickened to fit a variety of coffee servers firmly  
The compact design is portable. Enjoy coffee anytime and anywhere

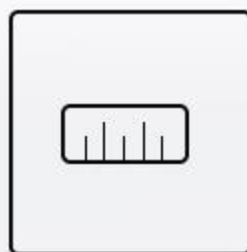

# TIMEMORE Standard

## Aesthetic Premium Quality

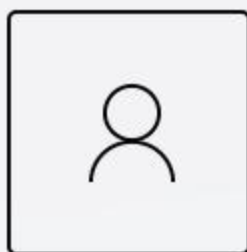

Temp  
difference 150°C

Precise  
measurement

High  
permeability

Ergonomics  
handle

## High Boron-silicate glass

### Instant temperature difference of 150°C

Hand-blown Boron-silicate glass with clear and soft texture  
can withstand instant temperature difference up to 150 °C

V-shaped round spout  
Smooth stream Neat water-drop

## High Boron-silicate glass

Instant temperature difference of 150°C

Hand-blown Boron-silicate glass with clear and soft texture  
can withstand instant temperature difference up to 150°C
